F1 Front Wing Set User manual

1. *Trim the lexan front wing with body scissors.*

2. *Place the lexan front wing over the F1 front wing base and align with the wing mounting holes. Mark the hole locations on the lexan front wing.*

3. *Use a body reamer and pre-drill four 1.5mm holes and one 2mm hole.*

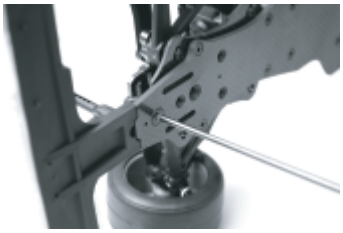

4. *Install the lexan front wing onto the plastic wing base using four M2x5 button head screws and one M3x6 button head screw.*

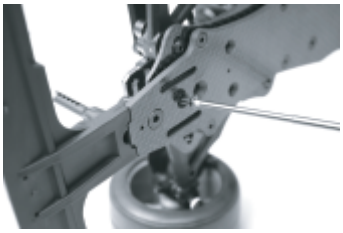

5. *Mount the front wing body post to the wing assembly with one M3x8 button head screw.*

6. *Install the front wing assembly onto the F1 chassis by using the M4x20 flat head screw and the M4 lock nut.*

7. *Install one M3x8 flat head screw thru the chassis and into the front wing.*

8. *Installation completed.*

Note: Remove the lexan front wing from the wing base and paint the front wing.
