INSTRUCTION MANUAL

S35-3E

1/8 Off Road Brushless Power Pro Buggy

INTRODUCTION

Based on the success of the S35-2E, SWORKz further developed and improved the E-buggy and came up with the S35-3E.

The S35-3E is the ultimate SWORKz 1/8th electric buggy at this moment. Its new rear suspension design and front ackerman steering system came directly from the 1/8th S35-3 nitro buggy. A new center transmission system gives all round improvements to the S35-3E.

The S35-3E newly designed arms are made from a strong standard nylon material. Optional carbon covers are available to adjust the arm's stiffness.

A new front Ackerman steering system and new front shock tower design allow you to change the front upper angle positions with ease.

The T-7075 aluminum chassis with its new design L.F.C (Lower Friction Coefficient) system will give more grip and at the same time less friction for the rear.

The S35-3E includes high quality parts, a refined shock system and many option parts.

The SWORKz S35-3E Pro Kit comes standard with many SWORKz Factory Team Option Parts.

SWORKz utilizes only the highest quality materials and industry leading manufacturing processes resulting in a faster, stronger, and more reliable vehicle. The S35-3E Pro Kit has been designed to win races.

Congratulations on your purchase of the new SWORKz S35-3E 1/8 scale off-road racing buggy pro kit.

Please read this manual thoroughly before you attempt to start running your S35-3E. This manual contains step-by-step instructions to help you complete, prepare for startup, and fine-tune your Buggy. Updates, setups, and product news will be posted on our website (www.sworkz.com) or SWORKz RC Face Book page.

As always, if you should ever have any questions or need help with your S35-3E, please feel free to contact our official SWORKz dealers and distributors, as they will be glad to help you. You may also contact us at any time for the most up to date information and support.
